

AQUASPORT

2300 DUAL CONSOLE

The 2300 Dual Console — the sister to the 2300 Center Console — has a fishing-friendly design with family comforts including an integrated swim platform and entertainment station. With insulated storage compartments in the bow for your gear and a head entry door making way to an optional self-contained toilet or optional VacuFlush marine head add to the convenience factor while your crew is out on the water. The 2300DC is ready to take on the action and fun with further optional equipment such as a removable table that can be used aft to fill in the center of the rear bench seat for more seating room, and a bimini top to help protect you from the elements.
